QUALIFICATIONS

Highly credentialed Technical Writer and hands-on Documentation Manager with exceptional experience developing and editing technologically-demanding content for print and web, for internal and end-user audiences, across multiple platforms. A veteran leader with 10+ years hiring, training and motivating teams; known for creating and organizing documentation departments and introducing documentation plans. Excels at facilitating productive working relationships with management, engineering personnel, and subordinates. Adept at defining processes and standards, and overseeing complex projects.

CAREER ACHIEVEMENTS

Technical Writer: 10+ years experience as multi-level technical writer, including online and hard-copy documents, online training, software and hardware. Created user guides, getting started guides, APIs & ADKs, knowledge bases, release notes, and videos. Familiar with Android, iOS, and mobile platforms.

Web Developer: 10+ years experience as a webmaster/front-end developer, with a comprehensive skill-set from technical programming to creation of original graphics, animations, videos, and text content. Experienced in JavaScript, HTML5, CSS3 and jQuery.

MadCap Flare Certified Advanced Developer: Experienced in designing and implementing MadCap Flare projects for multiple mediums (such as onscreen or print) and outputs (such as HTML, PDF, or MS Word). Converting projects from MS Word or Adobe FrameMaker to MadCap Flare. Experienced in creating knowledge bases and context help.

Project Manager: Experienced in managing teams and projects in an Agile environment. Managed remote and local groups/teams. Orchestrated schedules and deliverables, and oversees team output using Rally and Jira.
